Re: Technology Department Update

OVERVIEW OF PAST MONTH:

- **Infrastructure & Security:** Mike has singlehandedly replaced 112 of over 150 padlocks throughout the District. The Transmission group has replaced most of the ones at Lost Canyon and along the pipeline in Promontory, leaving only a handful to complete.

- **GIS & Asset Management:** Kadin continues to keep working with Customer Service and their use of the OpenGov Asset Management software. One hurdle has been the naming of new assets as their locations are collected in the field. We wanted to incorporate our 4 letter tank zones into the names to help identify assets in the system when not looking at them spatially. He was able to program some code behind the scenes to automate this process and to automatically fill in address data, speeding the collection process for all users and requiring less clicks per entry. Kadin will be providing a short OpenGov demo during the board meeting.

- **Statistics:**

Blue Stakes data:

Date	New	Update	Emergency
1/2026	135	28	10
2/2026	110	21	3
3/2026	245	23	2
4/2026	432	63	1
5/2026	409	81	13
6/2026	336	132	8
7/2026	330	106	15
8/2026	281	110	4
9/2026			
10/2026			
11/2026			
12/2026			
Year to date	2278	564	56
